Ideation Phase
Empathize & Discover

Date	31 January 2025
Team ID	LTVIP2026TMIDS80982
Project Name	Prosperity Prognosticator: Machine Learning for Startup Success Prediction
Maximum Marks	4 Marks

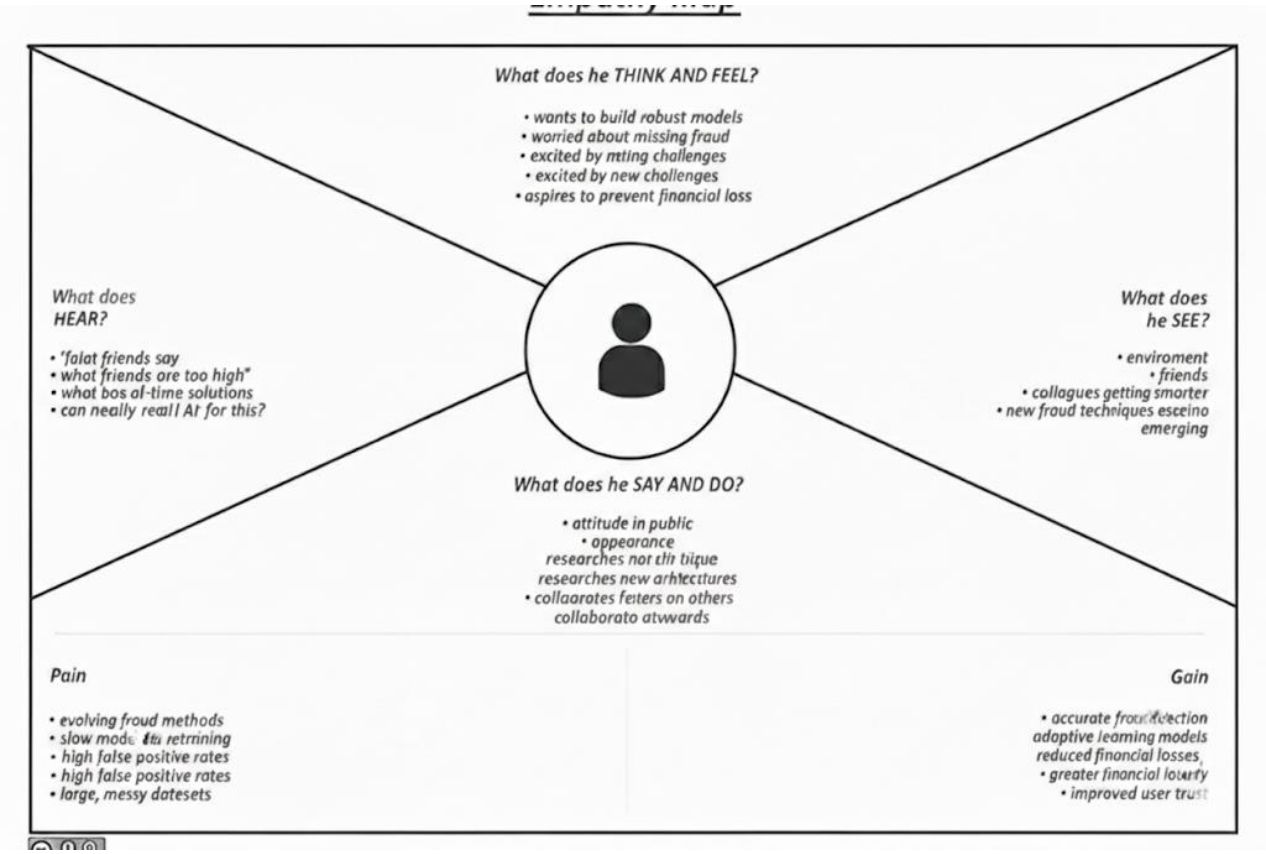
Empathy Map Canvas:

An empathy map helps us understand the user's thoughts, feelings, goals, and challenges. For this project, we considered two main users:

•StartupFounder/Entrepreneur
• Investor / Venture Capitalist

Below is the empathy map for a **Startup Founder**

Example:



User: Startup Founder / Entrepreneur

What the User Says

• “I want my startup to succeed.”
• “I need investors to trust my business.”
• “I want to know if my funding strategy is strong.”
• “I need better insights before making major decisions.”

What the User Thinks

• My startup may fail if I make wrong decisions.
• Investors look at funding history and milestones carefully.
• Competition in the market is very high.
• I need data-driven validation for my business model.

What the User Sees

• Many startups shutting down after initial funding.
• Investors rejecting proposals.
• News about startup failures.
• Other startups raising multiple funding rounds.

What the User Hears

• Advice from mentors about market risks.
• Stories about successful acquisitions.
• Feedback from investors about weak performance metrics.
• Discussions about funding challenges in startup communities.

User Pain Points (Challenges)

• Uncertainty about future success.
• Difficulty attracting investors.
• Lack of predictive insights.
• Risk of financial loss.
• Confusion about how funding and milestones impact success.
