Project Design Phase
Solution Architecture

Date	15 February 2025
Team ID	LTVIP2026TMIDS80982
Project Name	Prosperity Prognosticator: Machine Learning for Startup Success Prediction
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture bridges the gap between the business problem (startup success uncertainty and investment risk) and the technical implementation (Machine Learning based startup success prediction system).

The goals of the solution architecture are:

● Identify the most suitable Machine Learning algorithms and web technologies to predict startup success accurately.

● Describe the structure, workflow, and data flow of the startup prediction system to stakeholders.

● Define system features such as user input, success prediction, probability scoring, and result visualization.

● Provide technical specifications for development, deployment, and system management

Example - Solution Architecture Diagram:
