User Acceptance Testing (UAT) Template

Date	31 January 2025
Team ID	LTVIP2026TMIDS80982
Project Name	Prosperity Prognosticator: Machine Learning for Startup Success Prediction
Maximum Marks	

Project Overview:

Project Name: Prosperity Prognosticator: Machine Learning for Startup Success Prediction

Project Description:
A Machine Learning-based web application that predicts the success outcome of startups (Acquired / Closed / Operating) based on features such as funding amount, industry category, number of founders, funding rounds, and other business parameters. The system helps investors and entrepreneurs make data-driven decisions.

Project Version: Version 1.0

Testing Period: 10 december 2025 to 20 feburary 2026

Testing Scope:

Features and Functionalities to be Tested:

- User Registration & Login
- Startup Data Input Form
- Input Validation (Numerical & Categorical Fields)
- Startup Success Prediction
- Display of Prediction Result (Outcome + Probability)
- Model Performance Accuracy
- Admin Dashboard (if applicable)
- Database Storage of Input Data

User Stories / Requirements to be Tested:

- As a user, I should be able to register and log in securely.
- As a user, I should be able to enter startup details.
- As a user, I should receive a prediction result instantly.
- As a user, I should view probability score of prediction.
- As an admin, I should be able to view stored prediction records.

Testing Environment:

URL/Location: http://localhost:5000
Credentials (if required):
Username: testuser@gmail.com
Password: Test@123

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration	Step 1: Open registration page Step 2: Enter valid details Step 3: Click Register	User account created successfully	Account created successfully	Pass
TC-002	User Login	Step 1: Enter valid credentials Step 2: Click Login	User redirected to dashboard	Login successful	Pass
TC-003	Invalid Login	Step 1: Enter incorrect password Step 2: Click Login	Error message displayed	Error message shown	Pass
TC-004	Startup Data Input Validation	Step 1: Enter valid numeric values Step 2: Submit form	Form accepted successfully	Accepted	Pass
TC-005	Invalid Numeric Input	Step 1: Enter negative funding amount Step 2: Submit	Error message displayed	Error shown	Pass
TC-006	Startup Success Prediction	Step 1: Enter complete startup details Step 2: Click	Prediction result displayed (Acquired/Closed/Operating)	Prediction displayed correctly	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
		Predict			
TC-007	Probability Score Display	Step 1: Perform prediction Step 2: View probability	Probability score shown clearly	Displayed correctly	Pass
TC-008	Database Storage Check	Step 1: Submit prediction Step 2: Check database records	Data stored successfully	Data stored	Pass
TC-009	Response Time Test	Step 1: Submit prediction Step 2: Measure time	Response under 3 seconds	2.1 seconds	Pass
TC-010	Admin Dashboard Access	Step 1: Login as admin Step 2: View reports	All records displayed properly	Working correctly	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Form allows empty optional fields	Step 1: Leave optional field blank Step 2: Submit form	Low	Closed	Validation improved
BG-002	Probability formatting issue (2 decimal places not shown)	Step 1: Generate prediction Step 2: View probability	Medium	Closed	Fixed rounding logic
BG-003	Slow response during high load	Step 1: Submit multiple predictions simultaneously	Medium	In Progress	Optimize model loading

Sign-off:

Signature: _____

Notes:

- All test cases include both positive and negative scenarios.
- Feedback from testers has been incorporated for UI improvement.
- All critical and medium severity bugs have been resolved before deployment.
- Final approval required from Project Manager and Product Owner before production release
