A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task. It is part of an Epic.

A Story Point is a number that represents how much effort a story takes to complete (usually in the form of the Fibonacci series).

Story Point Scale (Fibonacci):
1 – Very Easy
2 – Easy
3 – Moderate
5 – Difficult

Story Points Used: 1, 2, 3, 5

Sprint 1

Model Development Phase

Data Collection (Epic 1)

• Collecting Startup Dataset (USN1) – 2
• Importing Dataset into System (USN2) – 1

Data Preparation (Epic 2)

• Handling Missing Values (USN3) – 3
• Data Cleaning & Formatting (USN4) – 3
• Handling Imbalanced Data (USN5) – 5

Feature Engineering (Epic 3)

• Creating New Startup Success Features (USN6) – 3
• Feature Selection (USN7) – 3

Total Story Points in Sprint 1 =
2 + 1 + 3 + 3 + 5 + 3 + 3 = 20

Sprint 2

Model Building & System Development Phase

Model Development (Epic 4)

• Splitting Training & Testing Data (USN8) – 2
• Training Machine Learning Model (USN9) – 5
• Model Evaluation (Accuracy, Precision, Recall) (USN10) – 3

Backend Development (Epic 5)

• Creating Flask API (USN11) – 5
• Integrating ML Model with Backend (USN12) – 5

Frontend Development (Epic 6)

• Designing User Interface (USN13) – 3
• Displaying Startup Prediction Result (Acquired / Closed) (USN14) – 2

Total Story Points in Sprint 2 =
2 + 5 + 3 + 5 + 5 + 3 + 2 = 25

Total Story Points

Sprint 1 = 20
Sprint 2 = 25

Total Story Points = 20 + 25 = 45
Number of Sprints = 2

Velocity Calculation

Velocity = Total Story Points / Number of Sprints

$$Velocity = TotalStoryPoints/NumberofSprints$$

Velocity = 45 / 2 = 22.5

Rounded Team Velocity ≈ 22 Story Points per Sprint

Final Result

Your team's velocity is approximately 22 Story Points per Sprint for the Startup Success Prediction using Machine Learning project.
