Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	LTVIP2026TMIDS80982
Project Name	Prosperity Prognosticator: Machine Learning for Startup Success Prediction
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution (Startup Success Prediction System).

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Startup Data Processing	Enter Startup Details (funding, rounds, milestones, etc.) Validate Input Data Store Startup Data in Database
FR-4	Startup Prediction System	Apply Machine Learning Model Predict Startup Outcome (Acquired / Closed) Display Success Probability
FR-5	Alert & Notification System	Send Prediction Result to User via Email Notify Admin for High-Risk Startups (optional)
FR-6	Admin Dashboard	View All Startup Predictions View Success/Failure Reports Manage Users

Non-Functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should be easy to use with a simple interface and clear navigation for users.
NFR-2	Security	User data must be encrypted. Secure authentication and OTP verification must be implemented.
NFR-3	Reliability	The system should provide accurate startup predictions with minimal errors.
NFR-4	Performance	The system should generate predictions in real-time with fast response time.
NFR-5	Availability	The application should be available 24/7 without interruption.
NFR-6	Scalability	The system should handle increasing number of users and startup data efficiently.
